About cookies

A cookie is a file containing an identifier that is sent by a web server to a web browser, and stored by the browser. The identifier is sometimes used to track information about when you visit pages and your interactions with them.

Cookies may be either "persistent" cookies or "session" cookies. A persistent cookie consists of a text file sent by a web server to a web browser, which will be stored by the browser and will remain

valid until its set expiry date (unless deleted by the user before the expiry date). A session cookie, on the other hand, will expire at the end of the user session, when the web browser is closed.

We use both session cookies and persistent cookies on this website.
